3 year 18 to 30 inches tall, 1 plant 40¢ each; 100 plants 35¢ each.

Heavy field grown seedling plants will produce a good crop first season.

4 years \$1.25 each; 5 years \$1.50 each.

\$5.00 SPECIAL HOME GARDEN ASSORTMENT

6 field grown plants 4 yr. old (bearing size) our selection and 4 hybrid seedlings 2 yr. size. This collection should produce berries over a period of eight weeks.

Cutting wood of Rancocas, Rubel and Grover (only).

Whips about 14 in. long, 10 whips to the bundle (not less than 10 whips per bundle of one variety) \$1.00 per bundle.

We are low on 2 yr. nursery grown plants on nearly all varieties listed except Hybrid seedlings, a certain number of 3 yr. old or older plants should be placed with order otherwise we may have to substitute varieties we run out of.

We have a small number of Grover (late variety) blueberry plants left in stock from 1 year to 8 year old sizes (prices same as Rubel).

Nursery stock of blueberry plants is low over the entire country, so order early and avoid disappointment.

SHIPPING CHARGES

An extra charge of 1¢ per plant on 1 yr. size, 2¢ on 2 yr. size, 4¢ on 3 yr. size, 15¢ on 4 yr. size, 20¢ on 5 yr. size and 35¢ on 8 yr. size should accompany order.

tax
(Washington customers please add 3% sales to your order)
(Extra plants from 1 to 3 yrs. old which will produce large berries given free with every order of \$5.00 or more.)

REMARKS

100-100000-1

This first section is devoted to the description of the

varieties of the plant and the results of the

experiments conducted with them.

One of the most important results of the

experiments is the fact that the

varieties of the plant differ in their

growth and development.

The results of the experiments are

summarized in the following table.

TABLE I

Summary of the results of the experiments

conducted with the varieties of the plant.

The results of the experiments are

summarized in the following table.

TABLE II

Summary of the results of the experiments

conducted with the varieties of the plant.

The results of the experiments are

summarized in the following table.

TABLE III

Summary of the results of the experiments

conducted with the varieties of the plant.

The results of the experiments are

summarized in the following table.

TABLE IV

Summary of the results of the experiments

conducted with the varieties of the plant.

The results of the experiments are

summarized in the following table.

TABLE V

Summary of the results of the experiments

PROMISING NEW VARIETIES

PEMBERTON--Coville Hybrid (Katherine Rubel cross)

Vigorous and very productive bush, berries larger than Rubel and better flavor, ripens late midseason.

B-322 - Eberhardt Hybrid (Pioneer Harding cross)

Bush strong grower, produces large clusters of dark blue berries of pleasing flavor, a good shipper. Ripens mid July.

D-4 - Eberhardt Hybrid (Pioneer Grover cross)

In good soil this plant may reach a height of seven feet. Is very vigorous, bears large leaf surface capable of nourishing a heavy crop of berries. Some berries up to one inch in diameter. Flavor is excellent. Easily pruned; ripens with Rancocas.
